Eric and Chip,

Thanks again for inviting the DEQ PMs to participate in the retreat. It really helped me understand the in-water investigation on a broader scale and the relationships of all the parties involved. I hope my comments during the final round table were not taken in a negative way and if I have any productive ideas to help in your interpretation of the data I will pass them along. Also, if you need me to provide any site specific upland information on my sites please don't hesitate to ask.

Mike Romero
